

# SLELCD Stealth-Locking Security Flat Screen Furniture Mount

The latest furniture mount from Lucasey is the **SLELCD** stealth-locking security mount which is based on the popular **SLE** semi-locking swivel mount. With this new design, the **SLELCD** becomes a completely secure mount which fits flat screen monitors up to 32".

## Security

The stealth locking system uses a two-part sliding cover that attaches from the bottom. Once installed, the mounting hardware is inaccessible without the SLE tool.

## Mounting Patterns

This furniture mount can hold VESA mounting patterns of the following dimensions:

- 75 mm x 75 mm
- 100 mm x 100 mm
- 200 mm x 100 mm
- 200 mm x 200 mm

The array of holes on the mounting plate allows the height of the flat panel to be set for optimum viewing.

## Standard SLE Features

The hidden swivel turns a full 360 degrees for more flexibility in placement of the set.

The mount is made of heavy gauge steel. The connector plate to the new mounting plate is made of the same high-quality 14-gauge steel. A sleek molded plastic cover hides the commercial-grade mount for a clean appearance.

Installation time for the base averages under two minutes, using either adhesive pads or bolting to the fixture. Add another minute or so to mount the screen to the mounting plate and you are ready for the next installation.
